Career Objective

Computer Science undergraduate with strong foundations in data structures, backend development, and API design. Experienced in building scalable systems and solving real-world problems using Python and modern technologies. Seeking a software development role to apply problem-solving and engineering skills.

Education

Chandigarh University, Mohali, Punjab, India	2023 – 2027
B.E. in Computer Science and Engineering	CGPA: 7.67/10
Delhi Public School, Varanasi, Uttar Pradesh, India	2020 – 2023
Class XII (CBSE): 74.6%	Class X (CBSE): 70.6%

Experience

Artificial Intelligence Intern Pinnacle Labs Pvt. Ltd. (Remote)	Dec 2025 – Jan 2026
- Tested and validated data processing workflows to ensure accuracy and efficiency - Optimized Python-based data processing workflows, improving execution efficiency by 30% - Engineered data pipelines for large-scale datasets, reducing latency and improving system reliability	
Artificial Intelligence Intern Appolo Computers Pvt. Ltd. (On-Site)	June 2025 – July 2025
- Built REST APIs using FastAPI, reducing response time by 25% - Automated workflows, reducing manual effort by 40% and improving operational productivity - Designed backend services handling 500+ requests/day with improved scalability and stability	

Projects

Resume Parsing System	Python, FastAPI, NLP
- Engineered an automated resume screening system processing 500+ resumes/day - Reduced recruiter workload by 70%, accelerating candidate shortlisting - Built real-time REST APIs for structured data extraction and integration	
Disease Prediction System	Python, Scikit-learn, XGBoost
- Developed an AI-based disease prediction system using ensemble learning for early diagnosis - Built end-to-end machine learning pipeline with preprocessing and API-based inference - Improved prediction accuracy and enabled real-time decision support for healthcare applications	
NeurAero Autonomous Flight System	FastAPI, Backend Systems, AI GitHub
- Developed and optimized real-time backend systems for high-performance applications - Identified system bottlenecks and improved response handling - Ensured reliability of integrated AI modules through systematic validation	

Certifications

- AI Fundamentals** – IBM SkillsBuild & Cisco Networking Academy (2025)
Covered machine learning concepts, data analysis, and AI applications
- JPMorgan Chase & Co. – Software Engineering Job Simulation** (Forage, 2026)
- Walmart USA – Advanced Software Engineering Program** (Forage, 2026)
Focused on scalable systems, backend architecture, and problem-solving

Achievements

- Solved 170+ DSA problems across coding platforms
- Built scalable systems handling 500+ requests/day

Innovation & Problem Solving

- Built AI solutions addressing real-world challenges in healthcare and recruitment automation
- Focused on designing scalable systems for data-intensive and high-performance applications

Skills

Programming: Python, C++, Java, SQL
Backend & Frontend: FastAPI, Node.js, REST APIs, HTML5, CSS3, JavaScript (Basic)
Machine Learning: Scikit-learn, XGBoost, Data Preprocessing, Model Evaluation
Core Computer Science: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks, Software Testing
System Design & Engineering: STLC, SDLC, Debugging, Testing, Agile Methodology
Tools & Platforms: Git, Linux, Postman
